WORK EXPERIENCE

Justtrack Germany · justtrack.io

Senior Product Designer

January 2025 – Present (1 yr 4 mo)

- Designed and implemented a design system that ensured platform consistency and accelerated development velocity 3×.
- Led a full navigation redesign, integrating an app-centric approach.
- Redesigned the AI Smart Insights diagnostics module — restructured alerts and data prioritisation to eliminate alert fatigue and enable fast, data-driven decision-making.
- Integrated Storybook into the design handoff process, minimising technical debt and component discrepancies.
- Designed concepts and prototypes incorporating AI tools into the design pipeline.

Lead Designer

February 2024 – January 2025 (1 yr)

- Led the full design lifecycle of CodeArts IDE for Java and Python — from information architecture to final UI.
- Conducted in-depth benchmarking and competitive analysis (VS Code, IntelliJ IDEA, Xcode) to apply best industry patterns.
- Designed a scalable design library focused on Developer Experience (DX) and complex engineering scenarios.
- Ensured continuous usability and interface performance improvements based on user feedback analysis and metrics.
- Built a tight collaboration process with engineering teams (30+ developers) to balance powerful functionality with ease of use.

EPAM Systems Bulgaria · epam.com

Lead Designer

August 2022 – February 2024 (1 yr 7 mo)

- Managed a distributed design team, overseeing professional development and mentoring.
- Established close collaboration processes with engineers, business analysts, and client-side stakeholders.
- Introduced Design Thinking methodologies and optimised internal processes to raise overall design maturity.
- Built the project design team: conducted technical interviews and oversaw the onboarding process.
- Led the development and maintenance of comprehensive design systems for large Enterprise ecosystems.

Senior UI/UX Designer

May 2021 – August 2022 (1 yr 4 mo)

- Designed and scaled design systems using advanced design-token architecture.
- Managed requirements gathering and UX strategy, translating business needs into functional specifications.
- Built complex interfaces for Enterprise ecosystems and high-load B2B products.
- Implemented Design QA processes: conducted systematic design reviews and mentored junior/mid-level specialists.
- Ensured interface accessibility (WCAG compliance) and optimised user journey performance.

Mentalstack Taganrog, Russia ·

Senior Web Designer

March 2019 – May 2021 (2 yr 3 mo)

- Owned the end-to-end design cycle for web and mobile products across Fintech, E-commerce, and Real Estate.
- Transformed business requirements into intuitive interfaces, conducting deep redesigns of legacy solutions based on user needs analysis.
- Managed stakeholder communication from initial requirements gathering to successful presentation of design concepts.
- Mentored junior designers and ensured quality control of visual and UX decisions across the team.

Saint Petersburg State University Saint Petersburg, Russia • spbu.ru

Head of Online Education Design Department

February 2017 – January 2019 (2 yr)

- Brand development and visual identity.
- Coordinated and led the production design team in creating educational media materials.
- Maintained a unified visual and quality standard across all MOOC (Massive Open Online Courses) content.

EDUCATION

Saint Petersburg State University

Master of Design

2012

SKILLS & TOOLS

Figma (Expert) · Design Systems · UI/UX Design · User Flows · Prototyping · Wireframing · Web Design · iOS / Material Design · UX Research · Usability Testing · CJM · UI Kits · HTML / CSS · Adobe After Effects · Illustrator · 3D · Team Leadership · Design Thinking · WCAG Accessibility · Storybook · AI-augmented Design

ABOUT

Product Designer with 10+ years of experience in product design and design process management. Proven track record of planning and leadership, predominantly with international clients and employers. Master's degree in Design from SPbGU. Worked on complex digital products combining hands-on contribution with mentorship as a playing coach. Deep understanding of business challenges and the Jobs-To-Be-Done framework. Strong communication skills. Solid programming fundamentals and frontend pattern knowledge. Designs scalable solutions. Expert-level Figma. Experienced in building and scaling design systems. Launches features from scratch. Conducts user research and UX testing. Actively uses AI in the design, automation, and design review process.
